

## Whole School Maths Challenge

6.5.20

You'll find two challenges here, just like we would normally have in school. You can have a go at one challenge or both. Have fun!

### Challenge 1 - positional language

*An adult or sibling will need to help you.*

Ask them to hide a toy in your house. Ask questions to find out where it is, starting with the room it is in and then more specific questions, for example, "Is it underneath something?" or "Is it behind something?" Then, you could hide the toy and they can ask questions to find it.

## Challenge 2 - money

*Sam says I can make 97p using just four coins. Is he correct?*

Use your addition skills to work out the answer.

If Sam is correct, what coins did he use?

If Sam is wrong, what coins would he need to make 97p?

Is there more than one way to make 97p?
