

Good Morning Everyone! 😊

Following on from yesterday's new learning with Mrs. Corrigan, here is a Numberblocks video looking at Place Value of teen numbers.

<https://www.youtube.com/watch?v=oqasY-BAeEY>

After you have watched the video your challenge is to make different teen numbers practically. At school we use straws to do this. We use one bundle of 10 straws representing the tens and individual straws represent the ones, see the picture below from our maths working wall.

You could use spaghetti, straws, cubes or lego. We look forward to seeing your pictures.

Have fun! 👍
